Snap Science: Everyday materials

Distinguish between an object and the material from which it is made.

Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock.

Describe the simple physical properties of a variety of everyday materials.

Compare and group together a variety of everyday materials on the basis of their simple physical properties.

Animals and Humans Snap Science: Looking at animals

Identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals.

Identify and name a variety of common animals that are

Snap Science:

Explore and compare the differences between things that are living, dead, and things that have never been alive.

Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other.

Identify and name a variety of plants and animals in their habitats, including micro-habitats.

Describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.

see me?

Recognise that they need light in order to see things and that dark is the absence of light.

Notice that light is reflected from surfaces.

Recognise that light from the sun can be dangerous and that there are ways to protect their eyes.

Recognise that shadows are formed when the light from a light source is blocked by a solid object.

Find patterns in the way that the size of shadows change.

Forces and Magnets Snap Science: The power of forces

Compare how things move on different surfaces.

Notice that some forces need contact between two objects, but magnetic forces can act at a distance.

Observe how magnets attract or repel each other and attract some materials and not others.

Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials.

Describe magnets as having two poles.

Predict whether two magnets

Snap science: Where does all that food go?

Describe the simple functions of the basic parts of the digestive system in humans.

Identify the different types of teeth in humans and their simple functions.

Construct and interpret a variety of food chains, identifying producers, predators and prey.

States of matter Snap science: In a state

Compare and group materials together, according to whether they are solids, liquids or gases.

Observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C)

Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.

and Beyond

Describe the movement of the Earth, and other planets, relative to the Sun in the solar system.

Describe the movement of the Moon relative to the Earth.

Describe the Sun, Earth and Moon as approximately spherical bodies.

Use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky.

Forces

Snap Science: Feel the Force

Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object.

Identify the effects of air resistance, water resistance and friction, that act between moving surfaces.

Recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect.

	<p>carnivores, herbivores and omnivores.</p> <p>Describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets).</p> <p>Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.</p> <p>Seasonal Changes Snap Science: Our changing world – Sensing Seasons</p> <p>Observe changes across the four seasons</p> <p>Observe and describe weather associated with the seasons and how day length varies.</p>		<p>will attract or repel each other, depending on which poles are facing.</p>			
Summer	<p>Plants Snap Science: Our Changing World-Plants/Plant detectives</p>	<p>Animals and humans Snap Science:</p> <p>Notice that animals, including humans, have offspring which grow into</p>	<p>Animals and Humans Snap Science: Amazing Bodies</p> <p>Identify that animals, including humans, need the right types and amount of nutrition, and</p>	<p>Electricity Snap science: Switched on</p> <p>Identify common appliances that run on electricity.</p> <p>Construct a simple series</p>	<p>Animals Snap Science: Reproduction in plants and animals</p> <p>Describe the changes as humans</p>	<p>Animals and humans: Snap Science:</p> <p>Identify and name the main parts of the human circulatory system, and describe the function of the heart, blood vessels and blood.</p> <p>Recognise the impact of diet, exercise, dr</p>

Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees.

Identify and describe the basic structure of a variety of common flowering plants, including trees.

Seasonal Changes
Snap Science: Our changing world – Sensing Seasons

Observe changes across the four seasons

Observe and describe weather associated with the seasons and how day length varies.

adults.

Find out about and describe the basic needs of animals, including humans, for survival (water, food and air).

Describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.

that they cannot make their own food; they get nutrition from what they eat.

Identify that humans and some other animals have skeletons and muscles for support, protection and movement.

Rocks
Snap Science: Rock Detectives

Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties.

Describe in simple terms how fossils are formed when things that have lived are trapped within rock.

Recognise that soils are made from rocks and organic matter.

electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers.

Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery.

Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit.

Recognise some common conductors and insulators, and associate metals with being good conductors.

Sound
Snap science: Good vibrations

Identify how sounds are made, associating some of them with something vibrating.

Recognise that vibrations from sounds travel through a medium to the ear.

Find patterns between the pitch of a sound and features of the object that produced it.

Find patterns between the volume of a sound and the strength of the vibrations that produced it.

Recognise that sounds get fainter as the distance from the sound source increases.

develop to old age.

Living Things/Habitats
Snap Science: Circle of Life

Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird.

Describe the life process of reproduction in some plants and animals.

and lifestyle on the way their bodies function.

Describe the ways in which nutrients and are transported within animals, including humans

Light
Snap Science:

Recognise that light appears to travel in straight lines.

Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye. Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes.

Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.

Electricity
Snap Science:

Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit.

Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches.

Use recognised symbols when representing a simple circuit in a diagram.

Working scientifically objectives (throughout the whole year):

Year 1:

Beginning to ask simple questions and recognising that they can be answered in different ways.	Beginning to observe more closely, using simple equipment.	Beginning to perform simple tests.	Beginning to identify and classify.	Beginning to use their observations and ideas to suggest answers to questions.	Beginning to gather and record simple data to help in answering questions.
--	--	------------------------------------	-------------------------------------	--	--

Year 2:

Asking simple questions and recognising that they can be answered in different ways.	Observing closely, using simple equipment.	Performing simple tests.	Identifying and classifying.	Using their observations and ideas to suggest answers to questions.	Gathering and recording data to help in answering questions.
--	--	--------------------------	------------------------------	---	--

Year 3:

Beginning to use results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions.	Beginning to identify differences, similarities or changes related to simple scientific ideas and processes.	Beginning to use straightforward scientific evidence to answer questions or to support their findings.	Beginning to report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions.	Beginning to gather, record, classify and present data in a variety of ways to help in answering questions.	Beginning to record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables.	Beginning to set up simple practical enquiries, comparative and fair tests.	Beginning to make systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment,
---	--	--	--	---	---	---	--

Beginning to ask relevant questions and using different types of scientific enquiries to answer them.

Year 4:

Using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions.	Identifying differences, similarities or changes related to simple scientific ideas and processes.	Using straightforward scientific evidence to answer questions or to support their findings.	Reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions.	Gathering, recording, classifying and presenting data in a variety of ways to help in answering questions.	Recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables.	Setting up simple practical enquiries, comparative and fair tests.	Making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment,
--	--	---	--	--	---	--	---

Asking relevant questions and using different types of scientific enquiries to answer them.

Asking relevant questions and using different types of scientific enquiries to answer them.

Year 5:

Beginning to identify scientific evidence that has been used to support or refute ideas or arguments.	Beginning to plan different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary.	Beginning to take measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate.	Beginning to record data and results of using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs.	Beginning to use test results to make predictions to set up further comparative and fair tests.	Beginning to report and represent findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and	written forms such as displays and other presentations.
---	---	---	---	---	--	---

Year 6:

Identifying scientific evidence that has been used to support or refute ideas or arguments.	Planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary.	Taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate.	Recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs.	Using test results to make predictions to set up further comparative and fair tests.	Reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and	written forms such as displays and other presentations.
